### **Nagoya Robocare Center opens**

CYBERDYNE, INC. [President and CEO: Yoshiyuki Sankai, (“The Company”)] announced to open Nagoya Robocare Center inside EDION Nagoya. Nagoya Robocare Center will be operated directly by Suzuka Robocare Center, a wholly owned subsidiary of the Company.

Suzuka Robocare Center had numbers of customers from Aichi prefecture frequently visiting the facility and the Company has been receiving request to open a center in Nagoya, which is central city of the prefecture. The Company coordinated with EDION Corporation to open Nagoya Robocare Center inside EDION Nagoya, which is within walking distance from Nagoya Station.

There are also number of facilities in Nagoya area using the Company’s HAL System and Nagoya Robocare Center is anticipated to be a center that could enhance further coordination with the Company’s clients, improving the accessibility to the HAL Systems allowing the Company to contribute further to the good health of the local community.

Similar to other Robocare Centers, Nagoya Robocare Center will utilize the Company’s Robot Suit HAL, a device that is activated by the intended motion of its wearer, to offer the state-of-the-art HAL FIT training program. The HAL FIT program is an advanced training program for visitors with disabilities or physical weaknesses. Nagoya Robocare Center will become the 11<sup>th</sup> Robocare Center to offer this advanced training program, following facilities like Okayama Robocare Center (opened May 23), Sendai Robocare Center (opened May 24), Hiroshima Robocare Center (opened July 1) and Kitakyushu Robocare Center (opened July 1). For the HAL FIT program offered in the related Robocare Centers, some private insurance contracts<sup>\*2</sup> and shareholder benefits<sup>\*3</sup> can be used. Upon using the aforementioned scheme, there are certain conditions, which would be applied. So please check the appendix for the details.

The Company will continue to expand its business in order to improve access by the potential visitors. Through this endeavor, the Company hopes to make contribution in the formation of a society where people with disability and elderly can continue to actively participate in social activities.
