Collaboration with Nippon Signal on the next-generation Cleaning Robot CL02 ~ Promoting Cybernics Technology towards train stations and station buildings ~

CYBERDYNE Inc. [Tsukuba, Ibaraki, CEO: Yoshiyuki Sankai (the “Company”)] announced to collaborate with NIPPON SIGNAL CO., LTD. (“Nippon Signal”) on promotion of the Company’s next-generation Cleaning Robot CL02 (“CL02”). By utilizing the network of Nippon Signal towards the railway industry, the Company aims to accelerate the promotion of CL02 significantly.

Since April 2018, the Company have been implementing CL02 towards shopping centers^{*1}, airports^{*2}, office buildings^{*3} and etc. With regards to the robot, the Company have received many inquiries from companies in the railway industry, such as railway stations and station buildings, because of CL02’s ability to run autonomously over a wide area and its extreme cleaning ability.

In order to implement the CL02 smoothly to these facilities, the Company determined to collaborate with Nippon Signal, company that excels at corresponding to managing systems that is unique in the railway industry. This collaboration allows the Company to work on the entire process from sales, installation support and maintenance work of CL02, making the Company well prepared to deploy CL02 towards the railway industry.

As a proof of the Company’s cutting-edge technology and “trust” of Nippon Signals, a company with a history of working with the railway industry over 90 years, the CL02 units that will be delivered from the Nippon Signal is scheduled to be signed with the name of both companies and be offered as a double brand product.
