**Announcement on business alliance with “Y’s Rehabilitation Center”
~ Coordination also for online home rehab “Neuro HALFIT at Home” ~**

CYBERDYNE Inc. [Tsukuba, Ibaraki, CEO: Yoshiyuki Sankai (the “Company”), together with its subsidiaries (“the Group”)] announced to form a business alliance with Y’s, Inc. [Minato-ku, Tokyo, CEO: Yasuhiro Hayami], a group company of medical information website operator m3 that operates rehab and healthcare business, on November 5, 2020.

“HAL” x “Y’s Rehab Center” = strong combination in rehab service in chronic phases

The Group offers Neuro HALFIT service to visitors with reduced physical function or visitors with a disability, with the aim of inducing improvement in the function of the brain-nerve systems. In this program that is offered in 16 Robocare Centers, Wearable Cyborg HAL is put on such visitors to activate their signal loop in their brain-nerve systems. Y’s, Inc. is known to be the biggest player in the market of self-paid rehab service for chronic stages* in Japan. Y’s operates 20 “Y’s Rehabilitation Center” that offers various one-on-one menus to support the visitors’ rehabilitation who are already in the chronic stages.

***Chronic stage**

Chronic stage is a stage where one would conduct rehabs that aims to maintain or improve the functions or ADLs that was acquired during acute and recovery stages. Rehabs in this stage will be done to improve QOL

Coordination on “Neuro HALFIT at Home”

The Group offers “Neuro HALFIT at Home” as a contactless service that could be practiced at home, which could contribute on chronic stage rehabilitation and prevention of frailty. The Group believes it is especially useful in the current situation where individuals must refrain from going outside of their house due to the spreading of new coronavirus, which could lead to lack of opportunity to work out and reduction of exercise load. The HAL device synchronizes with Cyberdyne’s cloud, enabling it to visualize information of bioelectrical signals and postures etc., which could help users to retrieve visual feedback and also receive remote support from their trainers/therapists. This alliance between the two company could realize greater quality of home program for customers who have difficulty visiting the center frequently.

The Group will coordinate with Y's to offer HAL programs to customers in need through Y's Rehabilitation Center and coordination on home program, in order to realize a society of health and longevity where all people could live healthy and rich life.

About Y's, Inc.

Y's, Inc. offers wide variety of menus such as "60 days improvement rehab", which is a personal rehab program to support improvement of conditions from aftereffects of diseases and injury. The company aims to create a new rehab service which will reinforce the system of Japanese medicine and care, and through its effective program the company aims to support all visitors who will never give up their hopes for further improvement, even in the chronic stages.
